

Header Tag Line – Smile Today with a Safe Home Protection System

Security is a big concern for many homeowners today. The home should be a safe and secure environment for every family. Leviton's home security system offers intelligent and secure solutions that provide round the clock protection coverage for every home. Camera surveillance and access control helps keep homes safe from unwanted intruders. Leviton's security features keep homeowners informed with instant notifications when no one is home. A fire and smoke warning system with safety features not found in most security systems notifies first responders immediately in case of a home fire. Homeowners will have more fun on vacations free from worry and stress. The system provides passive security to the home and simulates a lived in look.

Leviton's automated solutions for every homeowner keeps homes secure while saving energy, time and money. Homeowners can upgrade to an automated home security system that provides instant access to quality security, lighting, climate control and audio/video devices at the touch of a button. Lights will automatically light a dark home or room. A distributed audio system makes it easy for anyone to wirelessly stream music choices to any room in the home. Home lighting is easily adapted to an individual need for more or less light. Effective energy management provides a comfortable living environment at home while saving energy when residents are away. Homeowners may use a smartphone, tablet or another Leviton automation product to control security, lighting, energy management and entertainment in their homes.

Leviton representatives are always available to answer questions about Leviton's affordable home security and automation solutions. Upgrading a home to a secure, reliable, efficient and modern automated solution is easy. For a free quote or more information on how Leviton can offer an effective automated solution please provide contact information today.
